DETAILED ACTION

1. This office action is in response to Amendment filed on June 9, 2006. Claims 2, and 3 have been cancelled. Claims 1, 4-22, 24, 25, and 31-40 are currently pending and are under examination.

Election/Restrictions

2. Claims 1, 4-22, 24, 25, and 31-35 directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(b), claim 36-40, directed to the process of making or using the allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because a claimed invention previously withdrawn from consideration under 37 CFR 1.142 has been rejoined, **the restriction requirement between the groups as set forth in the Office action mailed on October 21, 2004 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claims including all the limitations of an allowable product claim or rejoined process claim are presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

3. Claims 1, 4-22, 24, 25, and 31-40 are allowable.

Art Unit: 1653

4. The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose a composition for the sustained release of biologically active polypeptide comprising a biocompatible polymer having dispersed therein a biologically active polypeptide, a sugar, a salting-out salt, and a corticosteroid wherein the corticosteroid is unencapsulated but commingled with the sustained release composition, and wherein the biologically active polypeptide is a glucoregulatory peptide. Shalaby et al. describe the sustained release of glucagons-like peptides by conjugating the peptide with a polyester composition such as poly(DL-lactic acid), but Shalaby et al. does not disclose a composition with a sugar, a salting-out salt, and a corticosteroid unencapsulated but commingled with the sustained release composition (see Abstract, and claim 10).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anand U. Desai, Ph.D. whose telephone number is (571) 272-0947. The examiner can normally be reached on Monday - Friday 9:00 a.m. - 5:30 p.m..
